SUMMARY

- 4+ years of Software Engineer experience, proficient in all phases of the web application lifecycle, including design, development, implementation, deployment, and maintenance.
- Expertise in dynamic web experiences using diverse technologies like Python, Java, JSON, HTML5, JavaScript, React.JS, Node.JS, Spring Boot and JQuery, delivering tailored solutions for unique needs.
- Experienced in designing and deploying scalable cloud-based web applications on AWS platforms, leveraging cloud services to optimize application performance and reliability.
- Excellent in database management with extensive experience in MySQL (SQL & PL/SQL) and NoSQL (MongoDB).

EDUCATION

Master's in computer science | University of Memphis, Memphis, Tennessee

Bachelor of Technology in Information Technology | Anurag group of institutions, Gatkesar, Telangana, India

TECHNICAL SKILLS

- **Methodologies:** SDLC, Agile, Scrum-Ban, Kanban
- **Programming Language:** Java, C++, Python, SQL, JavaScript
- **Frameworks/Libraries:** Spring Boot, Spring MVC, Spring Data JPA, Spring Cloud, React.JS, OAuth 2.0, Spark, GraphQL
- **Cloud:** AWS (SQS, SNS, S3, EC2, Lambda, CloudFormation, ECS, RDS, Code Pipeline, Code Deploy, Code Build, Kinesis Data streams), Microsoft Azure
- **Database:** MySQL, PostgreSQL, MongoDB, Oracle
- **Tools:** CI/CD (Jenkins, GitHub Actions, CodePipeline, CodeBuild, CodeDeploy), Docker, Kubernetes, Git, Splunk, Kibana, Kafka, Prometheus, Grafana
- **Other Skills:** Data Structures & Algorithms, System Design, Troubleshooting & Debugging

WORK EXPERIENCE

Sabre Corporation | Software Development Engineer

Dec 2024 – Present

- Contributed to the development of an **EDIFACT parser tool**, enabling internal teams to efficiently troubleshoot customer-reported issues and streamlining the debugging process.
- Designed and implemented Spring Boot services for structured data processing, automating message parsing to minimize manual effort and accelerate issue resolution.
- Built and optimized React components for internal dashboards, enhancing data visualization and reducing troubleshooting time.
- Documented the implementation and usage guidelines for new services, providing internal developers with comprehensive resources to troubleshoot issues and enhance their understanding of the system.

Amadeus Software Labs | Software Development Engineer

Feb 2019 – Dec 2022

- Developed Java Spring Boot REST APIs that seamlessly integrated with AWS RDS databases to deliver real-time data to client application.
- Contributed to the development of a **survey and feedback platform**, enabling clients to create surveys and gather customer insights, reducing feedback collection time.
- Designed and implemented a **real-time feed visualization tool**, streamlining debugging processes and enhancing incident resolution efficiency.
- Created reusable UI components in React using hooks and functional programming, optimizing state management with Redux, improving app performance and data flow efficiency.
- Implemented unit and integration tests using Spring Boot Test and Mockito, achieving 25% code coverage and improving code reliability in production.
- Contributed to refactoring monolithic applications into **microservices**, enhancing maintainability of backend systems.
- Collaborated closely with cross-functional teams to ensure timely delivery of features and bug fixes, ensuring high system reliability and customer satisfaction.

CERTIFICATIONS

- **AWS Certified Developer – Associate** [[View Certificate](#)]
- Database Programming with SQL from Oracle Academy. [[View Certificate](#)]
